

# Stardust

Stardust is a next generation, wholistic wealth management platform. We combine traditional wealth management with a powerful social network that allows you to easily track your finances, compare your performance against your peers, and use that actionable insight to help you achieve financial well-being.

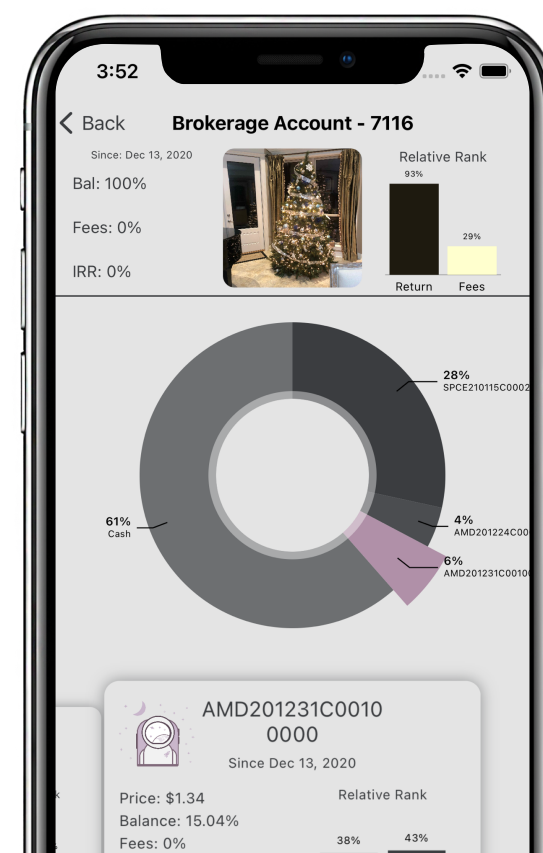

**Monitor** all your finances at a glance

**Compare** your fees and performance to your peers

**Explore** your friend's portfolios and strategies

What's our goal?

Our mission is to help everyone achieve their financial goals. The Stardust platform arms the social media generation with the knowledge and tools they need to thrive in an easy to use and familiar way.

## The Stardust Platform:

We keep a careful eye on your fees and returns, so you know exactly how your money is performing

Quickly see your accounts and balances at a glance

Add a description, photo and tag to make tracking your individual portfolios a breeze

Quickly see how your investments stack up against your peers on fees and returns

We connect directly to your accounts, so setting up your profile is as easy and simple as logging in to your bank

Our Tile UX language surfaces the important information and streamlines the details

### Profile

A secure summary of all of your financial holdings.

### Peers

An easy to manage list of all of your friend's portfolios, always ready for you to reference.

### Watchlists

Following a few portfolios or made your own custom blend? We'll keep track of all of them.

### Search

We ensure everyone's information is secure and private, and share only relative percentages.

## Our Team:

**Adit Patel**  
Columbia University  
BS Physics

An extensive background in **consumer finance** and marketing from setting up and **launching 3 new lines** of business @Capital One.

A deep, technical understanding of **marketplaces** and their dynamics from Strategy @Redbubble.

Went from 0 to **full stack engineer** who built the iOS app, AWS hosted Rails API, and our Python NLP search algorithm **in 6 months**

**Theresa Garcia**  
Louisiana State University  
BS Industrial Engineering

**E-commerce business owner** who previously managed a team of employees located all over the globe.

Grew her previous e-commerce company from **\$0 to over \$70,000** in sales per month in **less than 5 months** with global reach.

**Growth hacker** with a proven track record who handles marketing, outreach, product, and UX/UI design.
